Summary

Product Engineer and team lead building AI-powered 3D dental software and cloud platforms. Experienced across full-stack web, 3D/vision, ML infra, and DevOps, with recent focus on leading team, and shipping production features at startup and scale-up pace.

Skills

Languages	Python, TypeScript, C++, C
AI/ML	PyTorch, Vertex AI, Hugging Face
3D & Vision	Three.js, PyTorch3D, OpenCV, Open3D, Trimesh
Backend	Node.js, Express.js, Python
Frontend	React, Tailwind CSS
DevOps & Cloud	Docker, AWS, GCP, Firebase, Azure, CI/CD

Work Experience

Gloud

Seoul, S.Korea

PE1 TEAM LEAD

Nov. 2024 – Present

- Led a team of 7 engineers; introduced agile practices, structured GitHub project management, and a robust Turborepo-based CI/CD to improve velocity.
- Implemented RBAC and secured exposed storage, removing major vulnerabilities.
- Directed migration from AWS RDS to Google Firestore, reducing costs by 40% and improving scalability.
- Improved predictability and execution by breaking down features and running frequent alignment syncs.

Gloud

Seoul, S.Korea

PRODUCT ENGINEER

Aug. 2024 – Nov. 2024

- Redesigned payment system: added subscriptions, rentals, and prepaid credits; cut payment-related support tickets by 50%.
- Architected a web-based Dental CAD tool leveraging custom AI models to accelerate design workflows by 70%+.
- Developed an AI-powered sales support agent surfacing real-time client context via chat, driving a 15% engagement lift.
- Built a Raspberry Pi-based control module for in-house 3D printers with remote ops via admin dashboard.
- Oversaw custom 3D slicing software integrated with the admin app to automate printing workflow.

Steinfeld

Remote

SOFTWARE ENGINEER

Aug. 2021 – Aug. 2024

- Built core AI-driven product from early stage; contributed to acquisition by Gloud (Mar. 2025).
- Architected an end-to-end AI pipeline to generate 3D dental crown designs from intraoral scans, cutting design time from hours to under 5 minutes.
- Benchmarked 10+ 2D/3D generative and segmentation models to select top-performing algorithms by stage.
- Engineered scalable training pipelines on GCP Vertex AI enabling parallel experimentation and deployments.
- Developed serverless preprocessing to handle tens of thousands of 3D scan files in parallel.
- Built a beta web platform (ai.steinfeld.co) for client uploads, AI-generated designs, and in-browser CAD fine-tuning.

GE Appliances

Louisville, KY, USA

FIRMWARE ENGINEER INTERN

Jan. 2021 – Aug. 2021

- Developed C-based firmware for a new washing machine model; contributed to successful launch.
- Integrated a sub-board to enable automated detergent dispensing; implemented comms with main board.
- Implemented features including remote cycle selection and cloud communication protocols.
- Authored and submitted four patent applications (lint detection via light sensors, laundry clumping via accelerometers, water temperature error via humidity sensors, colored fabric identification via image analysis).

Sensorscall

Remote

EMBEDDED SOFTWARE INTERN

May 2019 – Jul. 2019

- Developed firmware in C for a smart home device featured at CES 2019 & 2020.
- Implemented VoIP, remote Wi-Fi provisioning, and auto lighting via ambient sensor.
- Integrated 5 sensor types (environmental, light, PIR, accelerometer, microphone).
- Identified and fixed critical memory leaks, improving long-term device stability.

Education

Georgia Institute of Technology

B.S. IN COMPUTER ENGINEERING, GPA 4.0/4.0

KAIST (Korea Advanced Institute of Science and Technology)

B.S. IN ELECTRICAL ENGINEERING, GPA 3.95/4.3 (MAJOR 4.2/4.3)

- Military service: Oct. 2015 – Jul. 2017

Atlanta, GA, USA

Jan. 2019 – Dec. 2020

Daejeon, S.Korea

Mar. 2014 – Aug. 2021

Honors

ACADEMIC HONORS

National Scholarship for Science and Engineering , Korea Student Aid Foundation – Full tuition and stipend for academic excellence	Mar 2014 – Jun 2020
Faculty Honors , Georgia Institute of Technology	Spring 2020
President's Undergraduate Research Award (PURA) , Georgia Institute of Technology – \$1,500 stipend for Rewind project at Embedded Pervasive Lab	May 2020
Grand Societal Challenge Prize (Team Hummingbird Lead) , Cornell Digital Agriculture Hackathon – International consortium of five agriculture universities; Sponsored by Microsoft & Cargill	Feb 2020
Dean's List , Georgia Institute of Technology	Spring 2019
Dean's List , Korea Advanced Institute of Science and Technology (KAIST)	Fall 2018
