“Be the change that you want to see in the world.”

## Summary

Product Engineer and team lead building AI-powered 3D dental software and cloud platforms. Experienced across full-stack web, 3D/vision, ML infra, and DevOps, with recent focus on leading teams, security, and shipping production features at startup and scale-up pace.

## Skills

|                           |                                              |
|---------------------------|----------------------------------------------|
| <b>Languages</b>          | Python, TypeScript, C++, C                   |
| <b>AI/ML</b>              | PyTorch, Vertex AI, Hugging Face             |
| <b>3D &amp; Vision</b>    | Three.js, PyTorch3D, OpenCV, Open3D, Trimesh |
| <b>Backend</b>            | Node.js, Express.js, Python                  |
| <b>Frontend</b>           | React, Tailwind CSS                          |
| <b>DevOps &amp; Cloud</b> | Docker, AWS, GCP, Firebase, Azure, CI/CD     |

## Work Experience

### Gloud

Seoul, S.Korea

PE1 TEAM LEAD

Nov. 2024 – Present

- Led a team of 7 engineers; introduced agile practices, structured GitHub project management, and a robust Turborepo-based CI/CD to improve velocity.
- Implemented RBAC and secured exposed storage, removing major vulnerabilities.
- Directed migration from AWS RDS to Google Firestore, reducing costs by 40% and improving scalability.
- Improved predictability and execution by breaking down features and running frequent alignment syncs.

### Gloud

Seoul, S.Korea

PRODUCT ENGINEER

Aug. 2024 – Nov. 2024

- Redesigned payment system: added subscriptions, rentals, and prepaid credits; cut payment-related support tickets by 50%.
- Architected a web-based Dental CAD tool leveraging custom AI models to accelerate design workflows by 70%+.
- Developed an AI-powered sales support agent surfacing real-time client context via chat, driving a 15% engagement lift.
- Built a Raspberry Pi-based control module for in-house 3D printers with remote ops via admin dashboard.
- Oversaw custom 3D slicing software integrated with the admin app to automate printing workflow.

### Steinfeld

Remote

SOFTWARE ENGINEER

Aug. 2021 – Aug. 2024

- Built core AI-driven product from early stage; contributed to acquisition by Gloud (Mar. 2025).
- Architected an end-to-end AI pipeline to generate 3D dental crown designs from intraoral scans, cutting design time from hours to under 5 minutes.
- Benchmarked 10+ 2D/3D generative and segmentation models to select top-performing algorithms by stage.
- Engineered scalable training pipelines on GCP Vertex AI enabling parallel experimentation and deployments.
- Developed serverless preprocessing to handle tens of thousands of 3D scan files in parallel.
- Built a beta web platform (ai.steinfeld.co) for client uploads, AI-generated designs, and in-browser CAD fine-tuning.

### GE Appliances

Louisville, KY, USA

FIRMWARE ENGINEER INTERN

Jan. 2021 – Aug. 2021

- Developed C-based firmware for a new washing machine model; contributed to successful launch.
- Integrated a sub-board to enable automated detergent dispensing; implemented comms with main board.
- Implemented features including remote cycle selection and cloud communication protocols.
- Authored and submitted four patent applications (lint detection via light sensors, laundry clumping via accelerometers, water temperature error via humidity sensors, colored fabric identification via image analysis).

## Sensorscall

Remote

EMBEDDED SOFTWARE INTERN

May 2019 – Jul. 2019

- Developed firmware in C for a smart home device featured at CES 2019 & 2020.
- Implemented VoIP, remote Wi-Fi provisioning, and auto lighting via ambient sensor.
- Integrated 5 sensor types (environmental, light, PIR, accelerometer, microphone).
- Identified and fixed critical memory leaks, improving long-term device stability.

## Omnious. Co., Ltd.

Seoul, S.Korea

SOFTWARE ARCHITECT

Jun. 2017 – May. 2018

- Provisioned an easily manageable hybrid infrastructure(Amazon AWS + On-premise) utilizing IaC(Infrastructure as Code) tools like Ansible, Packer and Terraform.
- Built fully automated CI/CD pipelines on CircleCI for containerized applications using Docker, AWS ECR and Rancher.
- Designed an overall service architecture and pipelines of the Machine Learning based Fashion Tagging API SaaS product with the micro-services architecture.
- Implemented several API microservices in Node.js Koa and in the serverless AWS Lambda functions.
- Deployed a centralized logging environment(ELK, Filebeat, CloudWatch, S3) which gather log data from docker containers and AWS resources.
- Deployed a centralized monitoring environment(Grafana, InfluxDB, CollectD) which gather system metrics as well as docker run-time metrics.

## PLAT Corp.

Seoul, S.Korea

CO-FOUNDER & SOFTWARE ENGINEER

Jan. 2016 – Jun. 2017

- Implemented RESTful API server for car rental booking application(CARPLAT in Google Play).
- Built and deployed overall service infrastructure utilizing Docker container, CircleCI, and several AWS stack(Including EC2, ECS, Route 53, S3, CloudFront, RDS, ElastiCache, IAM), focusing on high-availability, fault tolerance, and auto-scaling.
- Developed an easy-to-use Payment module which connects to major PG(Payment Gateway) companies in Korea.

## R.O.K Cyber Command, MND

Seoul, S.Korea

SOFTWARE ENGINEER & SECURITY RESEARCHER (COMPULSORY MILITARY SERVICE)

Aug. 2014 – Apr. 2016

- Lead engineer on agent-less backtracking system that can discover client device's fingerprint(including public and private IP) independently of the Proxy, VPN and NAT.

## ShitOne Corp.

Seoul, S.Korea

SOFTWARE ENGINEER

Dec. 2011 – Feb. 2012

- Developed a proxy drive smartphone application which connects proxy driver and customer.
- Implemented overall Android application logic and wrote API server for community service, along with lead engineer who designed bidding protocol on raw socket and implemented API server for bidding.

## Education

### Georgia Institute of Technology

Atlanta, GA, USA

B.S. IN COMPUTER ENGINEERING, GPA 4.0/4.0

Jan. 2019 – Dec. 2020

### KAIST (Korea Advanced Institute of Science and Technology)

Daejeon, S.Korea

B.S. IN ELECTRICAL ENGINEERING, GPA 3.95/4.3 (MAJOR 4.2/4.3)

Mar. 2014 – Aug. 2021

- Military service: Oct. 2015 – Jul. 2017
